Kate Jie Yu

STAFF PRODUCT DESIGNER (AI SYSTEMS) · FOUNDER

Bay Area, CA / katejieyu@gmail.com / linkedin.com/in/katejieyu / katejieyu.com / syncopro.com / github.com/katejieyu

PROFILE

Product Designer specializing in AI systems, founder, with **10+ years** building product systems across enterprise and AI-native environments.
I design systems that turn ambiguous ideas into **structured execution** — spanning product workflows, organizational decision-making, and AI systems. At **SAP**, I led **system-level workflow architecture** across supply chain platforms. At **SyncoPro**, I'm building an **AI-native product system** that generates structured product plans from early-stage ideas — currently in live beta with early founder testing and active product feedback.

EXPERIENCE

Staff Product Designer | SAP — 2022 -- Present

- Led **system-level workflow architecture** across supply chain platforms (ASN, GRN, Discovery Analytics) — improving decision clarity across cross-functional teams, reducing processing time by **30%**, and decreasing operational errors by **20%**.
- Reframed **product decision surfaces** in Discovery Analytics — increasing feature adoption by **35%** and reducing time-to-insight by **25%**.
- Established **design-to-code workflows** and reusable AI-assisted prototyping systems — enabling faster execution across design, product, and engineering.
- Built **governance infrastructure** through BN Design System — standardizing decision-ready components across enterprise teams.

Founder & Product Designer | SyncoPro — 2025 -- Present

- Built **SyncoPro** — an AI-native product system that turns early ideas into structured execution through reusable workflows and system-guided planning.
- Designed the core product system combining **decision architecture, AI workflows, and continuous learning loops** — turning outputs into reusable, improving systems over time.
- Defined **AI authority boundaries and escalation models** — structuring what the system decides autonomously vs. what requires human confirmation.

Senior UX Designer | Synopsys — 2020 -- 2022

- Led **UX strategy and platform architecture** through full digital transformation; redesigned navigation and content systems, increasing engagement — delivered global platforms under pandemic-era constraints, recognized by executive leadership for high-impact delivery.

Web Designer & Developer | Sage Intacct — 2018 -- 2020

- Drove **400% webinar traffic growth** in 2 months via UX redesign; designed enterprise event mobile app translating cross-functional requirements into a scalable UI system.

Freelance Product Designer | Kate Studio — 2014 -- Present

- Independent practice delivering **end-to-end SaaS product design** across B2B and consumer platforms; founded **Mighty Coupons** and **ReferMeJob** — full 0→1 product ownership from concept through launch.

CAPABILITIES

AI Product Systems · Decision Infrastructure Design / Agentic Workflows / AI Governance · **Product & Strategy** · Product Strategy / 0→1 Product Development / Enterprise SaaS Platforms · **Execution** · Design-to-Code / Design Systems / Organizational Governance

EDUCATION

Master of Arts Academy of Art University — 2016 -- 2018
